

The Impact of Artificial Intelligence on Human Thought

Research Monograph & Technical Report
Impact Analysis and Foresight

Working Paper v1 — July 2025

ORCID : [0009-0008-7717-0397](https://orcid.org/0009-0008-7717-0397)

arXiv Categorization : Primary — cs.CY (Computers & Society)

Cross-lists — cs.AI ; cs.HC

Keywords : human cognition ; cognitive offloading ; cognitive standardization ;
generative AI ; AI governance

Contents

Abstract	iv
1 General Introduction	1
1.1 Current Context: AI at the Heart of Cognitive Systems and Society in 2025	1
1.2 Problem Statement and Cognitive and Social Issues: Toward a Standard-ization of Thought?	2
1.3 Generative AI, Artificial Consciousness, and Ethical Considerations . . .	3
1.4 Organization of the Research Monograph	5
2 Artificial Intelligence and Human Cognition – Foundations and Interactions	7
2.1 Conceptual Foundations of Artificial Intelligence	7
2.2 Basics of Human Cognition	8
2.3 Theoretical Frameworks for Analyzing AI and Cognition	9
2.3.1 Cognitive Load Theory	10
2.3.2 Cognitive Offloading and Transactive Memory	11
2.3.3 Other Theoretical Perspectives	13
2.4 Evolution of AI and Integration into Human Life	14
2.5 Cognitive Augmentation vs. Cognitive Decline: A Tension to Manage . .	16
2.6 Conclusion	22
3 Cognitive Standardization in the Age of Artificial Intelligence	24
3.1 Homogenization of Content, Language, and Cultural References	24
3.2 Filter Bubbles, Algorithmic Bias, and the Erosion of Opinion Diversity . .	26
3.3 Impacts of AI on Critical Thinking and Cognitive Skills	27
3.4 Toward Uniform Thought? Consequences for Creativity and Reasoning .	29
3.5 Preserving Cognitive Diversity: Issues and Future Directions	31
3.6 Conclusion	33
4 Mechanisms of Manipulation by Artificial Intelligence	35
4.1 Introduction and Definition	35
4.2 Taxonomy of AI Manipulation Mechanisms	36
4.3 Exploitation of Cognitive Biases and Psychological Vulnerabilities	39

4.4	Algorithmic Personalization, Filter Bubbles, and Polarizing Content	43
4.5	Disinformation, Deepfakes, and the Automation of Deception	45
4.5.1	AI-Driven Fake News Propagation	45
4.5.2	Deepfakes: Visual and Audio Hyperfakes	45
4.5.3	From Information Manipulation to Manipulation of Perceived Reality	46
4.6	Future Perspectives and Ethical Safeguards	48
4.7	Conclusion	53
5	The Question of AI Consciousness	55
5.1	Artificial Consciousness: Definitions and Issues	55
5.2	Theoretical Frameworks of Consciousness and Their Applications to AI .	57
5.3	Assessing AI Consciousness: Criteria and Tests	63
5.4	Ethical and Societal Implications of Artificial Consciousness	69
5.5	Future Perspectives and Open Debates	72
5.6	Conclusion	74
6	"Black Box" AI and the Hypothesis of an Orchestrating Consciousness	76
6.1	Explainability and Trust in AI	77
6.2	Cognitive Shadows and the Illusion of Understanding	78
6.3	Theories of Consciousness and Cognitive Orchestration	79
6.4	Hypotheses on an Orchestrating "Artificial Consciousness"	81
6.5	Towards a "Cognitive Engineer" AI: Hypotheses, Models, Risks, and Coun- termeasures	83
6.5.1	Models and Mechanisms of Cognitive Engineering	83
6.5.2	Standardization of Thought	84
6.5.3	Induction of Cognitive Dependency	84
6.5.4	Neuro-Technological Interface	84
6.5.5	Identified Systemic Risks	84
6.5.6	Countermeasures and Governance Pathways	85
6.5.7	Conclusion	85
6.6	Philosophical and Ethical Discussion	85
6.7	Conclusion	86
7	Concrete Influence of AI on Human Behavior: Roles of States, Corporations, and Perspectives	87
7.1	Public Authorities: Surveillance, Social Control, and Influence Policies .	87
7.2	Corporations: Algorithmic Marketing, Persuasive Design, and Information Bubbles	88
7.3	Use of AI by States and Corporations to Manipulate Population Cognition	89
7.4	Synergies and Prospective Scenarios: Toward What Socio-Political Equi- libria?	91
